The Ecco Pocket GPS is a 'mark and return' keychain navigation device which helps you find your way back to any place you select. Forgotten where you parked your car, or off trekking in the wilds? Need to return to the scene of the donut? Well there you go. And do remember that it's got a range of 9,999 miles and a 1 month battery life, so you can really go a-wanderin' before you start off home again. £67.95.

*The Ecco Pocket GPS offers a first of its kind - this Personal Pocket GPS Locator will guide you so you can return to an exact location! Simply 'lock' your starting location, carry on without a care in the world, then follow the Ecco's LCD display back to your original location! The Ecco Pocket GPS will store up to three separate locations. What's more, with a range of up to 9,999 miles, a satellite acquisition time of approximately 30 - 60 seconds and accurate up to 10 metres even someone with the memory of a goldfish should be able to find their way home!*
